

Fabric Pest Treatment Preparation Sheet
(Including webbing clothes moth, case-making clothes moth, carpet beetle, etc.)

Items That Must Be Completed Prior To Our Arrival:

- Check clothing items carefully. Find everything that appears damaged or you suspect may have fabric pest activity. Look for small holes in any fabrics made from animal origin such as wool, wool blends, silk, furs or feathers. Infested articles should be cleaned according to manufacturers' directions or discarded.
- Look for damage in wool carpets, blankets, wool-covered furniture, animal hides, and fly-fishing lures. Let our office staff or technician know what items you think may have damage or fabric pest activity.
- Pull all furniture and other objects 12-18 inches away from the walls.
- Remove as many objects as possible from the floors, and vacuum all rooms thoroughly. Vacuum under all furniture as much as possible. Also, vacuum all upholstered furniture, including seams in cushions with crevice attachments. Dispose of bag outside.
- Remove all items from closets and vacuum floor of closet. Dispose of bag outside.
- Remove all pets and birds. Cover fish tanks and turn off pumps.
- Be prepared to leave, and vacate the premises for at least 4 hours.
- If you are ill or pregnant or if you or any member of your household has sensitivity to chemical odors or other odors, Whitworth Pest Solutions, Inc. recommends that you contact us for product information and consult with your physician prior to the treatment.

After Our Treatment Is Complete:

- Do not enter or allow children or pets to enter the treated structure for at least **4 hours**.
- Immediately upon entering the treated structure after the treatment, open all windows and doors and air out thoroughly.
- Clean and vacuum regularly. Don't neglect closets, upholstered furniture, cracks and crevices and under furniture. Vacuum both sides of wool rugs and rotate them periodically.
- Treated rugs should not be shampooed for at least one (1) month.
- Store only freshly washed or dry-cleaned garments made of wool and other fabrics of animal origin in airtight containers. Check stored items periodically (every month or two).
- If you have any questions before or after the treatment call 253-845-1818.

Unfortunately, there is no warranty on "one-time" fabric pest treatments due to circumstances out of our control, such as the re-introduction of infested clothing or other products from outside sources. If you would like continual protection, consider getting on our Premium Plus Program (12 service visits per year). This excellent pest control program covers many other pests as well. Ask us for details.
